

1. Meeting Information

Date & Time: 03/04/2026 6:30-8:30 PM (120 Minutes)
Location: In Person & Webex

Date & Time: 03/11/2026 6:00-7:30 PM (90 Minutes)
Location: Webex

2. Meeting Overview

03/04

- Completed individual module 5 project, determined team to-do's, deadlines.
- Assigned team to-do's, reviewed previous week's strengths and weaknesses.
- Discussed potential project ideas for capstone course.

03/11

- Reviewed team and individual progress for 5/5 core app components
 - Assigned responsibilities for HTTP Request Mocking, E2E Testing, and testing diagrams & visuals.
 - Solved team and individual app setup conflicts and component challenges.
-

3. App Contributor Roles & Teams

<i>Name</i>	<i>Role</i>	<i>Functional & Component Sub-Team</i>
Lauren Knotts	Team Lead, Full-stack Dev., Scribe	Education System
Baudelaire Messago Ngumouo	Full-stack Dev.	User Mgmt. (Carelink)
Dayne Allen-Wright	Full-stack Dev.	Appointment/Calendar
Dewey Mccrary	Full-stack Dev.	Appointment/Calendar
Tamia Jenkins	Full-stack Dev.	User Mgmt. (Carelink)
Ricardo Serrano	Full-stack Dev., Scribe	User Authentication

4. Team To-Do's

All team members are responsible for the following tasks:

- Set up Cypress in the Senior Helper project and show how it integrates (config files, folder structure)
- Mock/intercept at least one HTTP request using `cy.intercept()`
- Write an E2E test for at least one component from a user's perspective (e.g., "user clicks button - > sees result")
- Create any visuals needed for this milestone, including: a test flow diagram, selector strategy diagram, and a mocked API behavior diagram.
- Include brief meeting notes showing how the group collaborated during this milestone.

5. Decisions

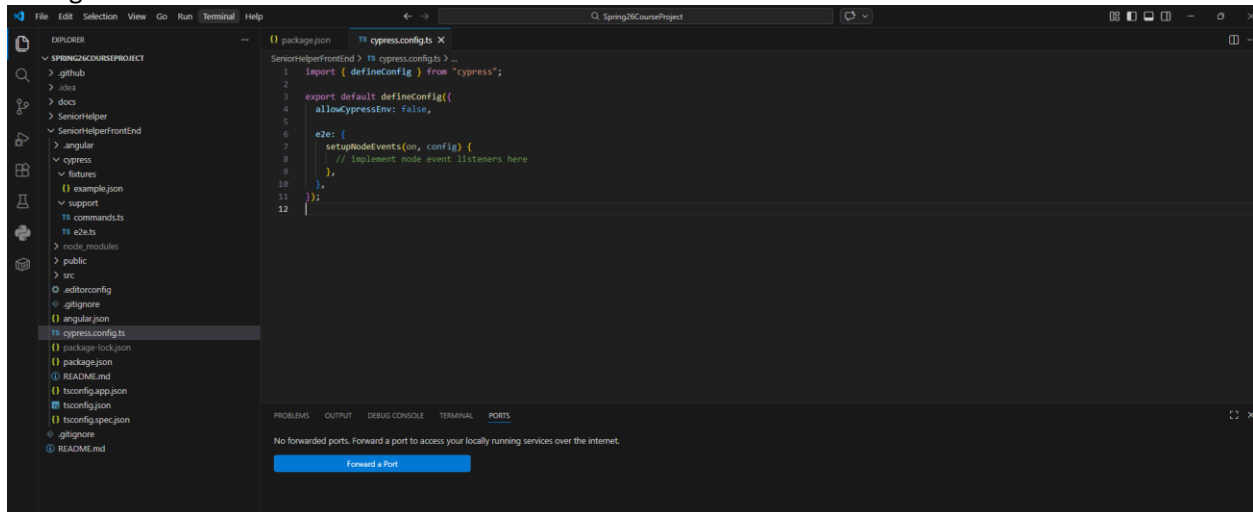

- Team deadlines for submissions making it into the milestone document is **03/14/26 11:00 PM**
 - Course Project Milestone document will be submitted no later than **03/15/26 12:00 PM**
-

6. Continued: Updating Spring 2026 Senior Helper Repository – Code

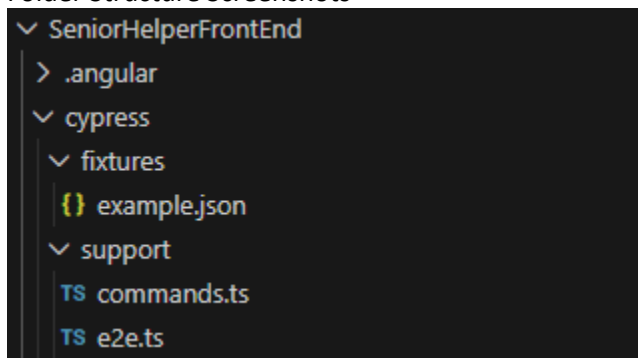

Component	Responsible Members	Completion Status
User Authentication (Login/Register/Logout)	Ricky	Complete
User Management (Carelink)	Baudelaire, Tamia	In Progress
Appointment/Calendar	Dayne, Dewey	No Update
Education System	Lauren	Mostly Complete
Navigation Bar & Footer	Lauren	Complete
Main Dashboard	Ricky	In Progress

7. Cypress Integration & Project Setup

Config File Screenshots

Folder Structure Screenshots

8. HTTP Request Mocking with cy.intercept()

We are mocking the main login request: POST `**/api/auth/login`

9. End-to-End (E2E) Test Implementation

E2E test for main login request from a user's perspective:

```
describe('Login', () => {
  beforeEach(() => {
    cy.visit('/login', {
      onBeforeLoad: (win) => {
        win.localStorage.clear();
        win.sessionStorage.clear();
      }
    });
  });

  it('logs in with any non-empty username/password (mock login)', () => {
    cy.intercept('POST', '**/api/auth/login', {
      statusCode: 200,
      body: {
        token: 'mock-token-123',
        message: 'Signed in successfully.'
      }
    }).as('loginRequest');

    cy.intercept('GET', '**/api/appointments/me', {
      statusCode: 200,
      body: []
    });

    cy.get('[data-cy="login-title"]').should('contain', 'Senior Helper');
    cy.get('[data-cy="username"]').type('student');
    cy.get('[data-cy="password"]').type('password123');
    cy.get('[data-cy="submit-login"]').click();
  });
});
```

```
    cy.wait('@loginRequest');
    cy.url().should('not.include', '/login');
  });

  it('shows an error if username/password are empty', () => {
    cy.get('form.login-form').submit();
    cy.get('.error').should('be.visible');
  });
});
```

Screenshot of the tests passing:

```
Running: login.cy.ts
(1 of 1)

Login
  ✓ logs in with any non-empty username/password (mock login) (2507ms)
  ✓ shows an error if username/password are empty (193ms)

2 passing (3s)

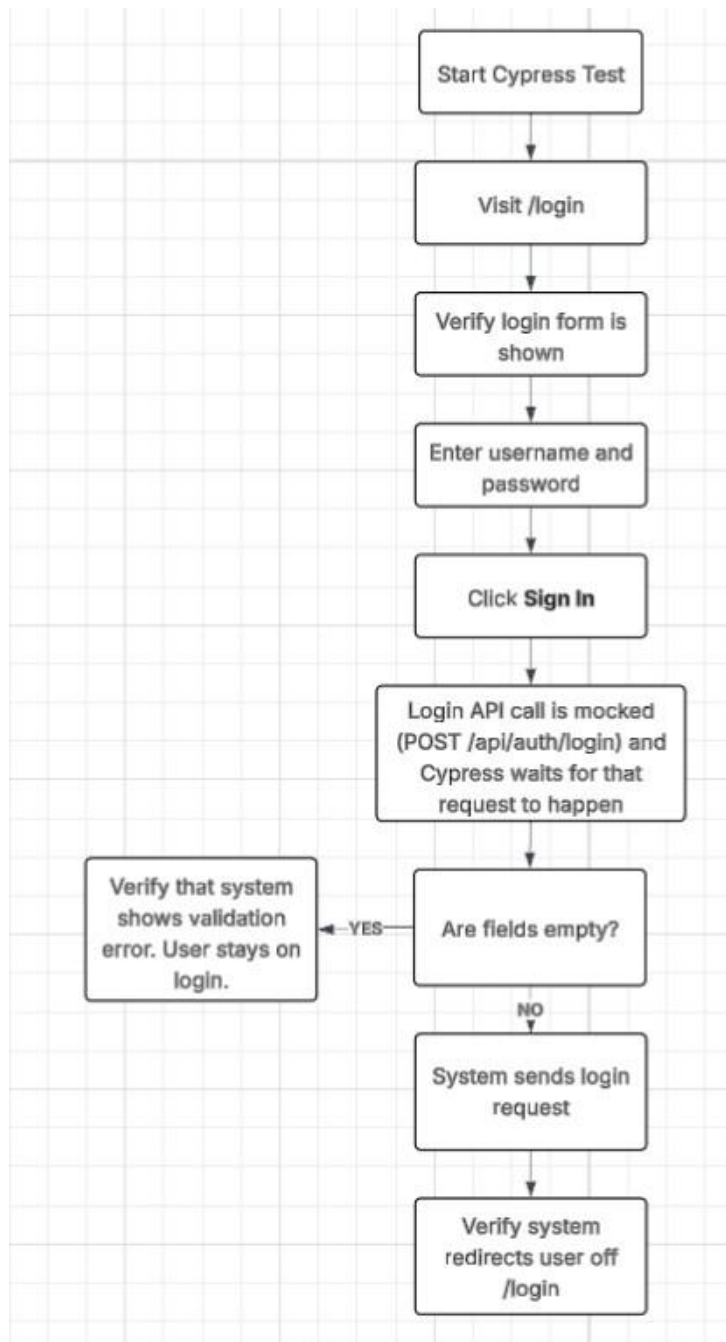

(Results)

| Tests:      2 |
| Passing:    2 |
| Failing:    0 |
| Pending:    0 |
| Skipped:    0 |
| Screenshots: 0 |
| Video:      false |
| Duration:   2 seconds |
| Spec Ran:   login.cy.ts |

Spec                                Tests  Passing  Failing  Pending  Skipped
✓ login.cy.ts                       00:02    2        2        -        -        -
✓ All specs passed!                 00:02    2        2        -        -        -
```

10. Testing Diagrams & Visuals

User-centered flow for login component that Cypress will test:

11. Selector strategy diagram using data-cy

Angular Template:

```

<h1 data-cy="login-title">Senior Helper</h1>
<input data-cy="username" name="username" />
<input data-cy="password" name="password" type="password" />
<button data-cy="submit-login" type="submit">Sign In</button>
<p data-cy="login-error-message" class="status error"></p>

```

Cypress Test:

```
cy.get('[data-cy="username"]').type('student');  
cy.get('[data-cy="password"]').type('password123');  
cy.get('[data-cy="submit-login"]').click();
```

```
// empty/invalid path
```

```
cy.get('[data-cy="login-error-message"]').should('be.visible');
```

12. Selector Planning Table

UI Element	Proposed data-cy	Purpose
Login Title	login-title	Confirms login page is loaded
Username Input	username	Username entry
Password Input	password	Password entry
Sign In Button	submit-login	Submit login form

13. Mock/intercept planning chart

HTTP Request	Cypress Action	Mock Response	Purpose
POST /api/auth/login	cy.intercept()	200 with mock token + success message JSON	Tests login success flow without requiring real backend auth
GET /api/appointments/me	cy.intercept()	200 with empty array	Stabilizes post-login /home load so login test doesn't fail
