

Senior Helper Application - CEN3024C Course Project Milestone 2

09/02/25

7:30 PM

Meeting Total: 90 Minutes

Location: In-person & Webex

I. Meeting Overview

This meeting focused on revising the Phase 1 user stories, specifically, grouping stories into themes, identifying a minimum viable product (MVP), utilizing the MoSCoW (Must have, Should have, Could have, Won't have now) method, and selecting 2 user stories that will be implemented in this milestone. Upon completion, the team split into groups of three to work on two separate features: Appointments and Login/Logout.

II. Team Member Roles

Role	Functional & Component Sub-Team	Name
Test	Login/Logout Feature	Tamia Jenkins
Scribe	Appointment Feature	Lauren Knotts
Database	Appointment Feature	Dewey Mcrary
Security SME	Login/Logout Feature	Baudelaire Messago Ngumouo
Backend Developer	Login/Logout Feature	Ricky Serrano
Interim Team Lead, Database	Appointment Feature	Britton Sutherland

III. Revised User Stories

Minimum Viable Product:

- Problem:** Senior citizens need a simple way to organize their appointments and day-to-day tasks, as well as an educational resource to both identify and avoid online scams and other forms of digital threats. Caregivers, who often help manage the tasks of the seniors they assist, may find difficulty in effectively communicating and coordinating schedules with their clients and loved ones.
- Solution (MVP):** A user-friendly 'Senior Helper Application' that provides seniors with a simplified task/appointment scheduler, accessible educational resources concerning online threats, and an option to invite a caregiver for further support. This allows the senior to maintain independence while allowing the caregiver to assist with scheduling as necessary.
- Target Audience:**
 - Primary Users:** Adults aged 65 and older who own a smartphone device and want an intuitive tool to help them stay organized, connected, and safe online.
 - Secondary Users:** Caregivers, family members, and other trusted parties who help manage a senior's daily schedule.
- Core Features and Functionality:**

- **User Onboarding Process:** A straightforward signup process, focusing on simplicity and accessibility, that can be completed by the senior or with the help of trusted secondary user.
- **Task & Appointment Management:** A simple calendar/checklist interface to create, read, update, delete, and track personal tasks and appointments. Offers ability to input task/appointment details such as the date, location, start and end time, and notes.
- **Educational Modules:** Small lessons and quizzes that track user progress and teach users how to recognize and avoid online scams and other common digital threats.

MoSCoW Method (Prioritized):

- Must Have:
 - U-1: As a user I want to see my appointments for the week.
 - U-9: As a user I want to register and login with a username/password.
- Should Have:
 - U-4: As a user I would like educational modules that map progress within the system.
 - U-7: As a caregiver, I want to be able to manage the senior I assist.
- Could Have:
 - U-3: As a user I would like to be able to share my calendar with anyone who has the app.
 - U-5: As a user customizable accessibility should be highly versatile.
 - U-8: As a user I want a FAQ page and on-screen tips to understand the application.
- Won't Have Now:
 - U-2: As a user and caregiver, I would like to be able to have customizable reminders.
 - U-6: As a user, I would like a secure notebook to hold personal data.

Affinity Mapping Themes (Grouped):

- Scheduling & Calendar: Orange
- Education & Engagement: Blue
- Security & Privacy: Red
- Health & Safety: Green
- Accessibility & Usability: Purple

Kanban board (via Miro):

Backlog | 7

U-7 As a caregiver, I want to be able to manage the senior I assist. LK

U-4 As a user I would like to have educational modules that map progress within the system. DM, LK, RS

U-3 As a user I would like to be able to share my calendar with anyone who has the app. DM

U-8 As a user I want a FAQ page and on-screen tips to understand the application. TJ & LK

U-5 As a user customizable accessibility should be highly versatile. DM

U-2 As a user and caregiver, I would like to be able to have customizable reminders. DM, BS, BMN

U-6 As a user, I would like a secure notebook to hold personal data. TJ

In progress | 2

U-9 As a user I want to register and log in with a username/password. BMN, RS, LK
(TJ, DM, RS)

U-1 As a user I want to see my appointments for the week. DS
(BS, LK, DM)
