

Senior Helper Application - CEN3024C Course Project Milestone 3

09/09/25

8:00 PM

Meeting Total: 60 Minutes

Location: In-person & Webex

I. Meeting Overview

Focused on revising the Milestone 2 MVP by selecting an additional two user stories to be included in the 'In Progress' section of the Miro board, U-4 (Educational Modules) and U-7 (Senior Management). The team also discussed ideas regarding the preliminary database tables, fields, and relationships. Upon completion, the team created two sub-teams to handle the newly added features: Educational Modules and Senior Management.

II. Team Member Roles

Role	Functional & Component Sub-Team	Name
Test	Login/Logout Feature	Tamia Jenkins
Scribe	Appointment Feature Educational Modules Feature	Lauren Knotts
Interim Team Lead, Database	Appointment Feature	Dewey Mccrary
Security SME	Login/Logout Feature Senior Management Feature	Baudelaire Messago Ngumouo
Backend Developer	Login/Logout Feature Educational Modules Feature	Ricky Serrano
Database	Appointment Feature Senior Management Feature	Britton Sutherland

III. Initial ER Diagram

Will be attached as a separate file within Canvas and GitHub.

IV. Finalized User Story Set

Minimum Viable Product (Revised)

1. **Problem Statement:** Senior citizens need a simple way to organize their appointments and day-to-day tasks, as well as an educational resource to both identify and avoid online scams and other forms of digital threats. Caregivers, who often help manage the tasks of the seniors they assist, may find difficulty in effectively communicating and coordinating schedules with their clients and loved ones.
2. **Solution (MVP):** A user-friendly 'Senior Helper' application that provides seniors with a simplified task/appointment scheduler, accessible educational resources concerning online threats, and an option to invite a caregiver for further support in maintaining their daily schedule. This allows the senior to maintain independence while allowing the caregiver to assist with scheduling as necessary.

3. Target Audience:

- **Primary Users:** Adults aged 65 and older who own a smartphone device and want an intuitive tool to help them stay organized, connected, and safe online.
- **Secondary Users:** Caregivers, family members, and other trusted parties who help manage a senior's daily schedule.

4. Core Features and Functionality:

- **User Onboarding Process:** A straightforward signup process, focusing on simplicity and accessibility, that can be completed by the senior or with the help of a trusted secondary user.
- **Senior Management:** Provides caregivers with a centralized platform to securely manage a senior's profile, daily schedule, and other relevant information.
- **Task & Appointment Management:** A simple calendar/checklist interface to create, read, update, delete, and track personal tasks and appointments. Offers the ability to input task/appointment details such as the date, location, start and end time, and notes.
- **Educational Modules:** Bite-sized lessons and quizzes that track user progress and teach users how to recognize and avoid online scams as well as other common digital threats.

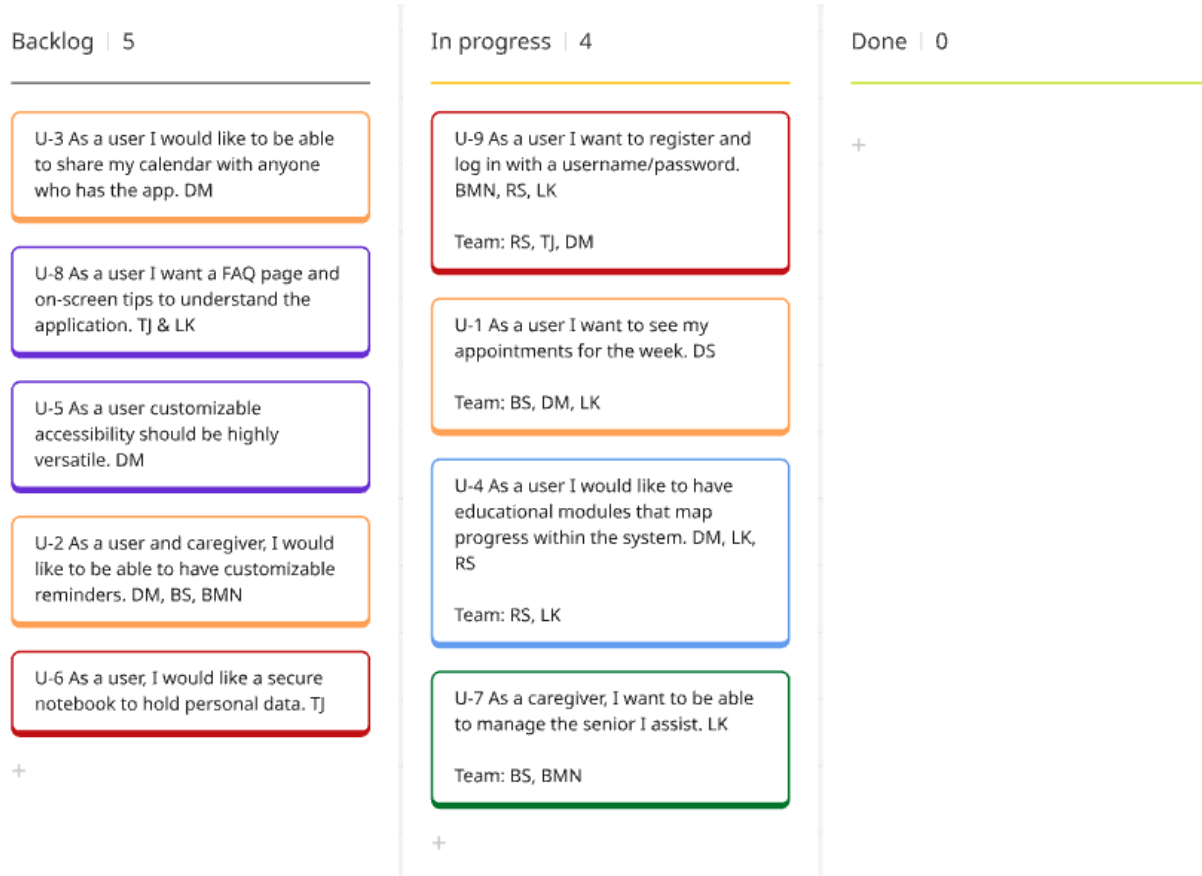

MoSCoW Method (Prioritized)

- **Must Have:**
 - o U-1: As a user I want to see my appointments for the week.
 - o U-9: As a user I want to register and login with a username/password.
- **Should Have:**
 - o U-4: As a user I would like educational modules that map progress within the system.
 - o U-7: As a caregiver, I want to be able to manage the senior I assist.
- **Could Have:**
 - o U-3: As a user I would like to be able to share my calendar with anyone who has the app.
 - o U-5: As a user customizable accessibility should be highly versatile.
 - o U-8: As a user I want a FAQ page and on-screen tips to understand the application.
- **Won't Have Now:**
 - o U-2: As a user and caregiver, I would like to be able to have customizable reminders.
 - o U-6: As a user, I would like a secure notebook to hold personal data.

Affinity Mapping Themes (Grouped)

- Scheduling & Calendar: Orange
- Education & Engagement: Blue
- Security & Privacy: Red
- Health & Security: Green
- Accessibility & Usability: Purple

Kanban Board via Miro

Updated sample requests (including happy path and 1-2 edge cases) for all features can be found in the Fall25CourseProject GitHub repository SeniorHelper > src > test > curl directory, organized by feature name. The REST API documentation for the features can similar be found under the curl directory and within the Controller/Service classes. README.md file has been updated by placing the curl tests in the appropriate directory and signifying where to go via the file.

09/12/25

9:30 AM

Meeting 2 Total Time: 30 Minutes

Location: Discord Voice Chat

I. Attending Members

Britton Sutherland, Ricky Serrano, Lauren Knotts, Tamia Jenkins, Baudelaire Messago Ngumouo, Dewey Mccrary

II. Meeting Notes

Discussed tips and challenges associated with the individual module 3 project and 'Senior Helper' application, reviewed the educational modules feature and known warnings, and how to implement the course project database.
