

Senior Helper Application - CEN3024C Course Project Milestone 5

09/30/25

6:30 PM

Meeting Total: 150 Minutes

Location: In-person & Webex

I. Meeting Overview

Updated unfinished APIs from previous week, removed commented code from the repository, worked on the CEN3024C Module 5 Project, discussed SeniorHelper structure and potential unused DTOs.

II. Team Member Roles

<i>Role</i>	<i>Functional & Component Sub-Team</i>	<i>Contributor Name</i>
Test	Login/Logout Feature	Tamia Jenkins
Scribe	Appointment Feature Educational Modules Feature	Lauren Knotts
Database	Appointment Feature	Dewey Mcrary
Security SME	Login/Logout Feature Senior Management Feature	Baudelaire Messago Ngumouo
Interim Team Lead, Backend Developer	Login/Logout Feature Educational Modules Feature	Ricky Serrano
Database	Appointment Feature Senior Management Feature	Britton Sutherland

III. Team To-do's (As of 9/30/25)

- Implement Swagger UI in the SeniorHelper application
- Teams will test ALL of their API endpoints from the SeniorHelper application; verifying its functionality and taking screenshots of the results.
- Include test screenshots within 'SwaggerUI_Endpoint_Tests' document (organized by controller or similar, please).
- Submission: Will include the Milestone 5 and SwaggerUI_Endpoint_Tests documents, updated GitHub repository, and any other relevant documentation.

IV. Meeting Notes

- Lauren will be OOO from October 2-4, Britton will act as scribe during this period.

Senior Helper Application - CEN3024C Course Project Milestone 5

10/07/25 **6:00 PM** **Meeting Total:** 180 Minutes **Location:** In-person & Webex

I. Meeting Overview

Created data.sql file to insert example data for SwaggerUI testing purposes, tested data.sql data on SwaggerUI for various endpoints, inserted screenshots into 'SwaggerUI_Endpoint_Tests' file.

What the App's Contributors Worked on During this Meeting:

- Lauren: Created initial data.sql file populated with modules/lessons/quizzes/questions/answers, began testing API endpoints on SwaggerUI, and posted screenshots to the SwaggerUI_Endpoint_Tests document.
- Ricky: Added to the data.sql file (additional Lessons, Quizzes) and then added Users and LessonCompletions to the file to allow me to test Progress features in swagger.
- Dewey: Added enumeration for roles and made progress toward figuring out what is making the 'Appointment feature recognize user ids in the running database.'
- Britton: Testing with Swagger.
- Baudelaire: Looked at a PR.
- Tamia: Reviewed project changes.

II. Meeting Notes

Re-evaluate need to host another meeting on Friday with the team.

Lesson DELETE method is not deleting, it will need fixed by Sunday 10/12 – Fixed 10/8, Lauren

III. Decisions (If any)

Teams will send what they worked on during meetings via Discord.

Teams will need to input the screenshots associated with their Swagger UI API Endpoint tests within the 'SwaggerUI_Endpoint_Tests' file; to be completed by members of that team.
