

Senior Helper Application – CEN4025C Course Project Milestone 1

1/14/26

7:00 PM

Meeting Total: 120 minutes

Location: In-person & Webex

I. Meeting Overview

Reviewed CEN3024C Miro board and updated user stories with a front-end focus. Created early website architecture layout and brainstormed task breakdowns for the primary development features: login/logout, educational system, and calendar/appointments. The team established functional & component sub-teams, with Dayne planning to rotate between teams as needed to learn the full SeniorHelper application.

II. App Contributor Roles & Task Completion

Contributor Name	Role	Functional & Component Sub-Team
Lauren Knotts	Team Lead, Scribe	Educational
Baudelaire Messago Ngumouo	TBD	User Mgmt. (Carelink)
Dayne Allen-Wright	TBD	Appointment
Dewey Mccrary	TBD	Appointment, User Authentication
Tamia Jenkins	TBD	User Mgmt. (Carelink)
Ricardo Serrano	TBD	Educational, User Authentication

III. Team To-Do's (As of 1/14/26)

All team members are responsible for the following tasks (except Canvas file submission):

Sprint Preparation:

- **Write & modify user stories:** Collaborate to clearly define user stories and backlog changes.
- **Break down tasks:** Decompose user stories into specific, manageable tasks.
- **Assign responsibilities:** Assign tasks to each team member based on functional team, expertise, and availability.
- **Develop design documents/sketches:** Create necessary initial design documents and sketches that outline planned work. Can be via program of choice or physical design.

Submission Deadlines:

- **Task Submission:** Submit the above to-do's **via Discord by EOD 1/17**. If you are unable to meet that date, please provide a progress update to the group chat or team lead **before 5:00 PM on 1/18**, when the milestone document will be finalized and submitted to Canvas & GitHub.
 - **Communication:** Keep the group chat or team lead updated on your progress, including any setbacks or delays, so the team can coordinate support and ensure timely submission for the **1/18 final deadline**.
-

IV. Decisions

- The Course Project Milestone 1 document will be submitted **January 18, 2026, at 5:00 PM.**
-

V. User Stories

US-01: User Authentication

As a returning user, I want to securely log into my account so I can access my personalized content and saved data.

Acceptance Criteria

- User can enter email/username and password
- Credentials are validated against the system
- User gains access only if credentials are correct
- Incorrect credentials produce a helpful error message
- Session persists until logout or token expiry
- All passwords stored securely (hash + salt)

US-02/03: Appointments/Calendar Dashboard (2)

As a user, I want to view, add, and edit appointments on a calendar so that I can manage my schedule effectively.

As a senior, I want to clearly see when and what appointments I have visually so that I can easily plan my day.

Acceptance Criteria

- User can add appointment by clicking a day on the calendar/add appointment
- Appointments correspond to both Schedule and Calendar view
- User can remove appointments by editing the appointment or clicking remove appointment

US-04: Educational Modules

As a senior, I want to browse available educational modules so that I can learn more about online safety topics.

Acceptance Criteria

- Module list displays in sequential order by ID (Module 1, Module 2, etc.)
- Each module shows title, description, and progress indicator (x of x lessons completed)
- Module displays appropriate button based on whether lessons have been completed within that module or not (e.g. ternary operator 'Continue' : 'Start Module')
- Users can click to view any module details at any time
- Completed modules show checkmark / similar
- All modules are accessible regardless of completion status

US-05: Complete Lessons

As a senior, I want to access and complete any lesson within a module so that I can learn at my own pace.

Acceptance Criteria

- All lessons are available and accessible at any time
- User can navigate to any lesson in any order, but within a lesson, a user can only move forward or backward
- User can mark lessons as complete
- Progress updates in real-time and saves
- No lessons are locked or restricted

US-06: Take Module Quiz

As a senior, I want to take a quiz after learning from a module so that I can test my knowledge about online safety.

Acceptance Criteria

- Quiz displays questions with multiple choice answers
- User can select one answer per question
- Questions and answers display on a singular screen to simplify complexity.
- Quiz shows progress indicator (e.g., "Question 2 of 5")
- Quiz displays results with score and encouraging feedback (e.g. ternary operator 'Congratulations!' : 'Keep Learning!')
- User can retake a quiz at any time

US-07: Link a Caregiver to a Senior (Carelink)

As a family member or caretaker, I want to be able to link myself to an active senior account.

Acceptance Criteria

- User can link a senior account using a Senior ID or unique connection code
- User can enter a Senior ID or code into an input field
- System validates the Senior ID exists and is active
- User cannot link to the same senior more than once
- Successful linking displays a confirmation message
- Once linked, the user can see the senior in their connections list
- Invalid or non-existent Senior IDs display a helpful error message
- Connection is saved in the database with appropriate role metadata

Contributor Notes:

- **Primary Contributor:** Tamia Jenkins, submitted complete deliverables 1/18/26 at 2:10 PM.
 - Baudelaire submitted duplicate user stories, which were merged with Tamia's US-07. Submitted task breakdowns were direct duplicates of previously submitted tasks and removed from this document. Design sketches were not implemented by the final 1/18/26 4:35 PM deadline.
-

VI. Task Breakdowns

US-01: User Authentication (Login/Logout)

- 1.1 Create login page layout
 - **Assigned: Ricky**
- 1.2 Implement login form components
 - **Assigned: Ricky**
- 1.3 Client-Side validation
 - **Assigned: Ricky**
- 1.4 Wire form to backend login endpoint
 - **Assigned: Ricky**
- 1.5 Redirect after successful login
 - **Assigned: Ricky**
- 1.6 Implement logout button
 - **Assigned: Dewey**
- 1.7 Wire logout button to logout endpoint
 - **Assigned: Dewey**
- 1.8 Redirect to home/login page after logging out
 - **Assigned: Dewey**
- 1.9 Implement loading indicators (spinner / "logging in..." text on button)
 - **Assigned: Dewey**

US-02/03: Appointments / Calendar Dashboard

- 2.1 Create Calendar and Appointments layout
 - **Assigned: Dayne/Dewey**
 - **Notes:** Angular has a built-in calendar object that we should use and add on-click events to add appointments to and Appointments data table in Postgres.
- 2.2 Create Navigation UI surrounding Calendar
 - **Assigned: Dayne**
 - **Notes:** Angular has a built-in calendar object that we should use and add on-click events to add appointments to and Appointments data table in Postgres.
- 2.3 Implement adding Appointment features
 - **Assigned: Dayne**
 - **Notes:** See Mock-Up Below
- 2.4 Create Alternative Calendar Layout (*Schedule View*)
 - **Assigned: Dewey**
- 2.5 Ensure Appointments on calendar are relatable to Notes version
 - **Assigned: Dewey**

US-04: Educational Modules

- 4.1 Create module list component with sequential ordering
 - **Assigned: Lauren**
- 4.2 Design and implement module card UI
 - **Assigned: Lauren**
- 4.3 Integrate with modules API endpoint
 - **Assigned: Lauren**
- 4.4 Add progress tracking display(s)

- **Assigned: Lauren/Ricky**

US-05: Complete Educational Lessons

- 5.1 Create lesson viewer component
 - **Assigned: Ricky**
- 5.2 Implement lesson completion logic (Mark complete/incomplete)
 - **Assigned: Ricky**
- 5.3 Add navigation to access all lessons freely
 - **Assigned: Ricky**
- 5.4 Display lesson list with completion status indicators (checkmark/green indication)
 - **Assigned: Ricky**

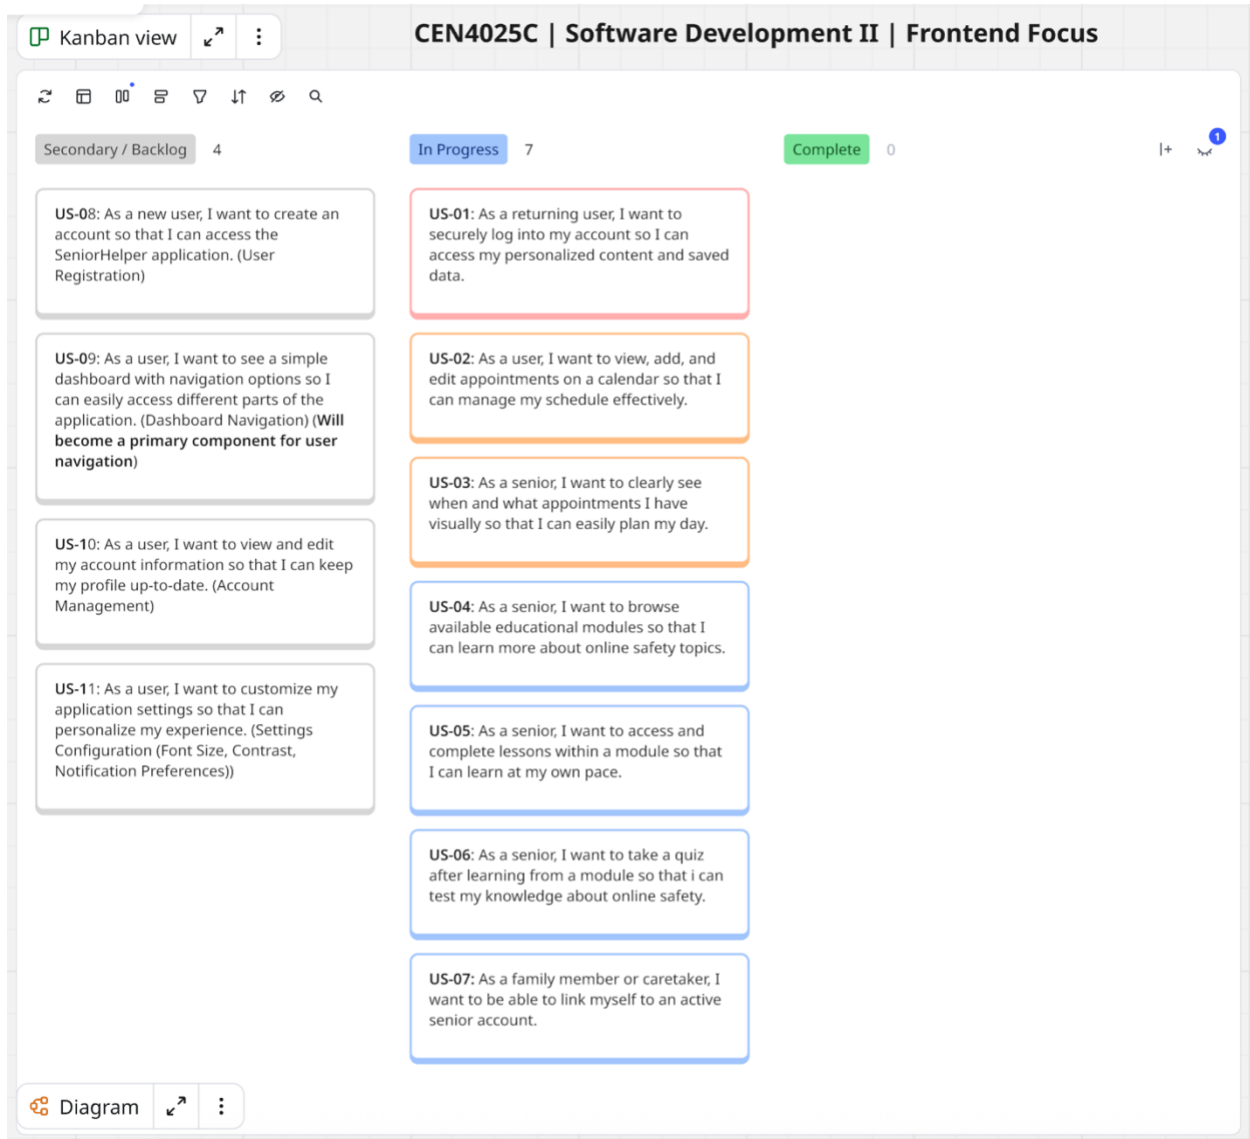

US-06: Take Module Quiz

- 6.1 Create quiz component with question display
 - **Assigned: Lauren**
- 6.2 Build question component with answer choices
 - **Assigned: Lauren**
- 6.3 Create quiz results component with score and text display (x out of x correct)
 - **Assigned: Lauren**
- 6.4 Add quiz completion tracking via API
 - **Assigned: Lauren/Ricky**

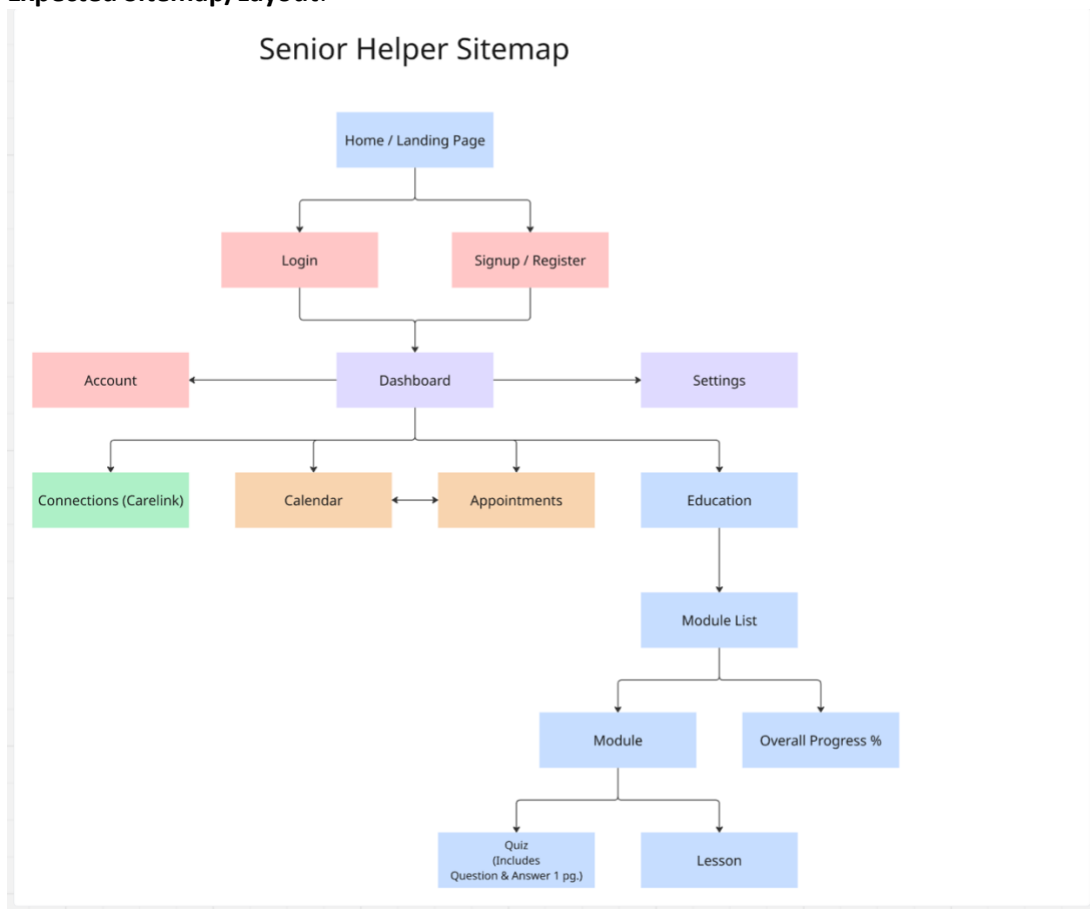

US-07: Link a Caregiver to a Senior (Carelink)

- 7.1 Create connection page
 - **Assigned: Tamia**
- 7.2 Implement senior – user form
 - **Assigned: Tamia**
- 7.3 Redirect back to connection page
 - **Assigned: Tamia**
- 7.4 Implement already made connections page
 - **Assigned: Tamia**

VII. Updated Miro Board (Created Kanban board with a frontend focus)

Expected Sitemap/Layout:

VIII. Initial Website/Page Sketches
