

CEN3024C Course Project - Phase 1 Overview

08/26/25

8:00 PM

Meeting 1 Total Time: 60 Minutes

Location: In-person

I. Meeting Overview

Consisted of introducing the course project concept, creating initial user stories on the Miro board, assigning weekly tasks, and introducing the project's team members. Dewey also established a Discord server that will serve as our main project communication tool in addition to the CEN3024C Slack channel. The following sections will cover the first version of the course project description, team member roles, user story selections, and environment description.

II. Course Project Description

The course project will focus on developing a Senior Helper Application that combines daily task/appointment management with educational activities. The project's goals include helping older individuals protect themselves from scams and growing digital threats, better manage their day-to-day lives, and provide caregivers with an intuitive application to manage their clients or loved ones.

III. Team Member Roles

<i>Role</i>	<i>Functional & Component Sub-Team</i>	<i>Name</i>
Test		Tamia Jenkins
Interim Team Lead, Scribe		Lauren Knotts
Database		Dewey Mccrary
Security SME		Baudelaire Messago Ngumouo
Backend Developer		Ricky Serrano
Database		Britton Sutherland

* As of this phase, functional and component sub-teams will be designated as necessary based on individual interests to support the application. **Important Note:** No front-end components or responsibilities will be assigned during this semester.

IV. Environment Description

This section outlines the project's overall environment, including backend development, planning and design, documentation, communication, version control, and other relevant tools.

Backend Development

- Java 17: The core programming language for the application.
- Spring Data JPA: A framework used to simplify database interactions.
- PostgreSQL: The RDBMS selected for data storage.
- IntelliJ IDEA Ultimate: The primary IDE for the application.

Version Control and Strategies

- GitHub Repository: The version control system used to cleanly host the project's code.
- Feature Branching: The strategy for managing code development; new features are built on separate branches as necessary and merged upon peer-reviewed pull requests.

Planning and Design

- Miro: Used as a Kanban tool for tracking and managing user stories.
- ER Diagram Tool: Used to design and document the database schema (presumably Draw.io or Lucidchart).

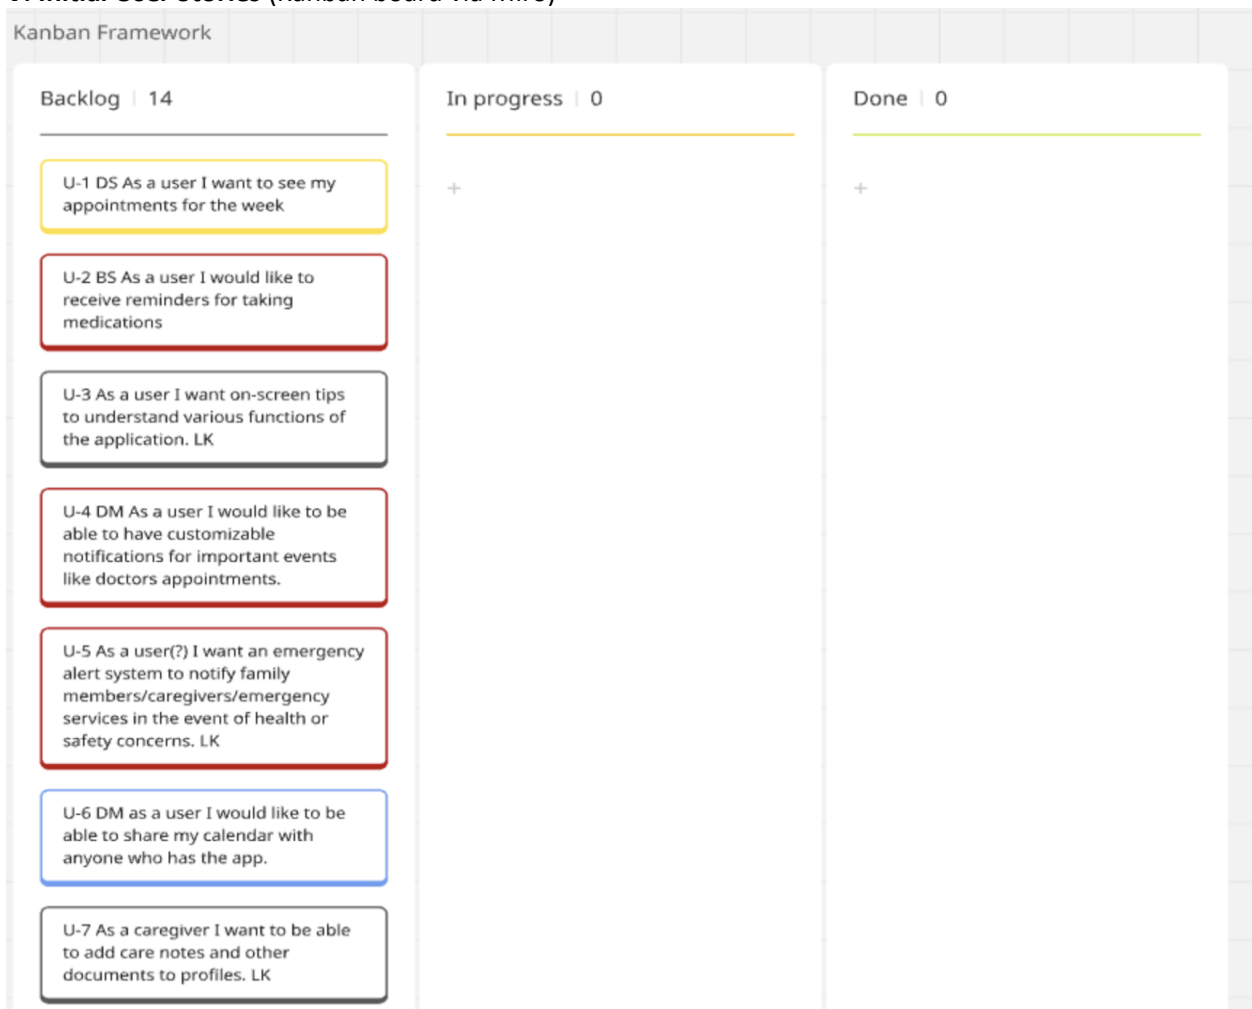

Communication

- Discord: The team's main communication channel for all project related things.
- Slack: Secondary communication channel.

Documentation

- Microsoft Word/Excel: Used for managing project data and creating various project documents (meeting minutes, notes, overviews, specifications, etc.).

V. Initial User Stories (Kanban board via Miro)

U-8 DM as a user I would like to be able to have a quiz or word game that helps put the educational aspect of this app in perspective.

U-9 As a user, I want to have access to community resources and support services. LK

U-10 DM as a user customizable accessibility should be highly versatile to help address any disabilities that come with age.

U-11 As a user, I would like a secure place to keep my passwords for apps TJ

U-12 As a user I want a profile of my important information (name, age, health conditions) LK

U-13 As a user, would like to get to get constant reminders regarding password changes for more security. BMN

U-14 As a user I want to track my progress on educational modules (lessons, quizzes) LK

U-15 As a user, I want to log in securely with a username/password so that my personal information is protected. RS

U-16 As a user, I want my session to automatically log out after a period of inactivity so that my account stays secure. RS

U-17 As a user, I want to see my progress in the educational modules so that I feel encouraged to keep learning. RS

08/28/25

9:00 AM

Meeting 2 Total Time: 45 Minutes

Location: Discord Voice Chat

I. Attending Members

Tamia Jenkins, Lauren Knotts, Dewey Mccrary, Baudelaire Messago Ngumouo, Ricky Serrano, Britton Sutherland

II. Agenda

- Discuss team roles, functional/component sub teams, potential responsibilities, and role flexibility.
- Collectively decide direction of the course project, consisting of narrowing down user stories, brainstorming ideas, and deciding backlog and in-progress features.
- Review GitHub repository and project documentation.
- Address roadblocks, if any.

III. Meeting Notes

Collectively reduced the number of user stories on Miro from 18 to 9, furthering the overall direction and focus of the course project. Discussed varying types of users and their potential needs within the application, such as seniors, caregivers, and the backend team. Identified the AI Scam Checker as an end goal of the application, with more focus placed on ensuring the application meets its core features and is fully functional by end-of-term. Reviewed the possibility of using biometrics in addition to passwords in the application and secure notebook (encrypted ciphertext). Discussed using the Model-View-Controller (MVC) pattern to structure the code in the repository.

IV. Week 1 Finalized User Stories (Kanban board via Miro)

Backlog | 9

U-1 As a user I want to see my appointments for the week. DS

U-2 As a user and caregiver, I would like to be able to have customizable notifications to stay organized. DM, BS, BMN

U-3 As a user I would like to be able to share my calendar with anyone who has the app. DM

U-4 As a user I would like to have educational modules that track and validate my progress within the system. DM, LK, RS

U-5 As a user customizable accessibility should be highly versatile to help address any disabilities that come with age. DM

U-6 As a user, I would like a secure notebook to hold personal data. TJ

U-7 As a caregiver, I want to be able to manage the senior I assist. LK

U-8 As a user I want a FAQ page and on-screen tips to understand the application. TJ & LK

U-9 As a user I want to register and log in with a username/password so that my personal information is protected. BMN, RS, LK
